Dr Alexander Groddeck

4th TPAO CONGRESS Treatment Planning in Aligner Orthodontics

- Impacted and ectopic teeth with aligners
- Out of the comfort zone! Complex malocclusions with aligners and TADs
- Early treatment with aligners: Unlocking the potential
- The next standard: Remote orthodontic treatment with 4 premolar extraction
- How to be highly efficient in your aligner biomechanics using auxiliary techniques
- New tools, new rules: Rethinking orthodontics
- Race like a pro: Precision and performance in aligner treatment
- Staging isn't everything: Mastering the bigger picture
- Mandibular repositioning therapy: Fundamental mechanisms, therapeutic procedures, and clinical efficacy
- Mix & match aligners and sliders to refine and expand our clinical outcomes
- Streamlined interdisciplinary care for complex dental cases: The role of digital aligner workflows
- The future of aligner therapy in the digital age – quality management and AI monitoring
- Thinking function in aligner therapy: A TMJ-based approach towards a new concept in functional orthodontics
- Align & conquer: Game-changing clinical strategies for advanced cases
- Significant optimization of aligner treatment predictability for sustainable outcomes
- Slider and aligner combination: Optimal staging for double the speed and half the stress
- The best of everything: Combining expertise, technology and passion
- Breaking the surgical paradigm: Mastering class III corrections with clear aligners
- TMJ-oriented protocols for aligner treatment – digital innovations for optimizing function
- Integration of CBCT in treatment planning for periodontally compromised patients

28 Nov 2025 9:00 am – 5:15 pm / 29 Nov 2025 9:00 am – 5:30 pm

CE Credits: **16**

Participants are awarded 16 credit points per advanced training course in accordance with the BZÄK/DGZMK guidelines (German Dental Association/German Society for Dental, Oral and Maxillofacial Medicine).

Cologne, 29.11.2025, Matthias Peper
